256MB		I/O DATA SanDisk
128MB	I/O DATA	SD-128M

* When you format a 2GB SD memory card on the Micro BR, you will only be able to use up to 1GB of its capacity. The way to format a 2GB SD memory card is the same as a 1GB SD memory card.

Once you format a 2GB SD memory card on the Micro BR, it will not go back to 2GB capacity, even if you format it using a PC OS (Windows / Mac)
